CALIFORNIA CANCER REGISTRY PUBLICATIONS, 2003

The background of the cover features a blue-toned abstract graphic. It consists of numerous white, semi-transparent letters of the alphabet (A through Z) scattered across the upper half of the page. These letters appear to be floating or moving in a radial pattern from the center. In the lower half, there are large, flowing, white, ribbon-like shapes that resemble open books or perhaps DNA helixes. A clear glass syringe is positioned in the lower right quadrant, pointing diagonally upwards towards the floating letters.

Cooperative Thyrotoxicosis Therapy Follow-up Study Group. *JAMA* 1998;280:347-55.

The background of the image is a solid blue color. Overlaid on it are numerous white, semi-transparent letters of the English alphabet, which appear to be scattered or flying through space. These letters are illuminated by a series of bright, radial light rays emanating from the bottom right corner, creating a sense of depth and motion. The overall effect is like looking into a celestial or digital space where letters are the stars.
